

The 21st International Zeolite Conference

July 13-18, 2025 • Dalian • China

Dear _____,

The 21st International Zeolite Conference (21st IZC) is scheduled to take place from July 13th to 18th, 2025, in Dalian, China, renowned as one of the most picturesque coastal cities in the country. The primary objective of the conference is to foster constructive dialogues and collaboration among researchers from academy and industry, postdoctoral fellows, and students.

This conference aims to sustain the momentum of advancing both the fundamental and applied sciences of porous materials. These materials encompass a diverse array, including microporous zeolites and zeolitic materials, metal-organic frameworks (MOFs), covalent organic frameworks (COFs), mesoporous structural materials, and porous mixed solids, among others. The overarching themes of the conference will encompass, but not be limited to, the synthesis of porous materials, cutting-edge characterization techniques and modeling, catalytic applications, as well as gas adsorption and separation processes, etc.

We extend a cordial invitation to scholars and practitioners from across the globe to participate in this enriching academic event. Join us in Dalian for engaging discussions, insightful presentations, and valuable networking opportunities as we collectively explore the frontiers of porous materials research.

Looking forward to your active involvement in the 21st IZC.

Warm regards,

Professor Jihong Yu
Jilin University
Chair, the 21st International Zeolite Conference

Professor Zhongmin Liu
Dalian Institute of Chemical Physics (DICP), CAS
Co-chairs, the 21st International Zeolite Conference

Professor Zaiku Xie
SINOPEC
